OUR BUSINESS SERVICE

- Supporting You To Establish your company within the Vasdaq Group
Fostering capable IT engineers and managers to form a company within the Group and then supporting them as presidents during incubation period:
 - This will result in them being completely set up to develop their business initiative, develop their company, grow its value, and then acquire the stock spinning off to be independent of the group.
 - So far, more than 70 companies were established and 40 have already become independent from the group with a work-force of more than 10000 employees.

- Developing and Operating Software
Our group possesses more than 1500 engineers.
 - Utilizing this pool of talent we have developed a number of commercial programs and software packages including robot techniques etc.
 - These packages are being promoted overseas and adapted to the international market where we have offices or affiliates, such as China
 - a case study for this is a case where Japanese SE will be permanently stationed in these overseas locations to provide ongoing technical support to the customers.
 - Our group comprises bridge engineers who are highly specialized in their field and will provide local guidance on how to operate the software. They will specialize in their work except for the development of managing network and the like.

- ITIL BUSINESS
One of our Group companies – Nihon IP Innovation -- has been appointed as exclusive sales agents for the TSO (former Her Majesty`s Stationary Office) Best Management Practice Online web site comprising the world standard “ITIL®” Version 3 Japanese Language content. As well as one of the authorized distributors of PDF “ITIL®” Version 3 content.

ITIL is the de facto standard as “ISO20000” for giving qualifications to a company in IT Service Management.

ITIL is a registered mark of the UK Government’s Office of Government Commerce.

- Development and Sales Business of VASDAQ-IT
This business will promote “Mieruka Management” (Making the on-the-job situation and the issuing point visible).

The display of the Internet and in-house business information will be automatically displayed 24 hours. It is possible to watch them without complicated work-process. “Mieruka Management” was the management method originally created in Japan and readily used by management consulting firms.

- Robot Research, Development and Marketing Business
Development of business sales and marketing for the robot:
 - Fulfills its functions such as: distributing leaflets, sending out questionnaires at a street corner, surveying the passing traffic, and acting as a guide etc.
 - Played an active part held before the opening at the Aichi Expo of Japan, 2005.
 - Also participated actively in the publicity of Takashimaya Department Store and Oji Paper-Manufacturing Company and in the other various events.
 - The robot developed by our group research is now displayed at Robot Museum in Fukuoka.
- Other Kinds of Business
Your company can advertise and identify employee candidates by using Website “SoralicJob” for various situations-vacant advertisement, which is free of charge.
IT School “Gijuku” offering a specialty of developing specialty programs.
Management Consulting and Security Consulting.
Selling programs and applications to various types of businesses on behalf of your company etc.
